

Machine Learning Approaches in Anti-microbial Peptide Based Drug Discovery

Needs major revision. The focus of the paper is, "interactions of drug carriers with cells & influence on cellular uptake" but the entire abstract is just about the properties of nanoparticles, the abstract should be modified to focus on cellular interaction part. Moreover, title is, "Intracellular delivery of Nanoparticles in infectious diseases" but abstract is not related to the title at all.

The candidates are advised to maintain the following characteristics before the final submission:

- Novelty/Realistic
- Practical Feasibility
- Expected Outcome

Some important links to understand how to write a research paper/manuscript:
