

Using IoT to calibrate lighting environments with the help of WiFi

The work must demonstrate actual energy saving. There are various commercial applications available and research works done. Please compare your experimental work against without any energy saving techniques and against commercial and state-of-the-art techniques

The candidates are advised to maintain the following characteristics before the final submission:

- Novelty/Realistic
- Practical Feasibility
- Expected Outcome

Some important links to understand how to write a research paper/manuscript:
