

## **Measures to prevent shadowing of 5G signals and augment non-line-of-site communication channels**

The authors target a very relevant issue, however the abstract gives no clue of what they propose for avoiding shadowing etc. Giving an intuitive idea of the solutions should be at least half of the abstract. Also in the paper the author should make clear sections for each of those techniques and explain them nicely.

and <https://arxiv.org/pdf/1708.02557>.

The candidates are advised to maintain the following characteristics before the final submission:

- Novelty/Realistic
- Practical Feasibility
- Expected Outcome
