USE OF AUGMENTED REALITY IN PLANNING AND STRATEGIZING

There is already much work done in AR. The authors have not done any simulation/experimental work and have not planned to do so (as reflected in the writeup) which makes the contribution very less. Demonstration of existing techniques can not be accepted as research contribution for publication.

The candidates are advised to maintain the following characteristics before the final submission:

- Novelty/Realistic
- Practical Feasibility
- Expected Outcome

Some important links to understand how to write a research paper/manuscript:
